ABOUT

Senior UX/UI Designer with 10+ years of experience turning complex customer and business needs into intuitive digital experiences. My experience spans end-to-end design across ecommerce, FinTech, and self-service product support. My process runs from discovery through validation, with a focus on usability testing, measurable outcomes, and AI-enabled design. My earlier background in development and building a music-tech startup shapes how I approach UX—balancing user needs with technical feasibility, execution, and business goals

EXPERIENCE

MONDO, Senior UX Designer *Nov 2024 - Present*

Consultant for Lippert

Lippert is a global manufacturer and supplier of premium components for the RV, marine, automotive, and building products industries.

- Co-led UX design for Ranch Hand's website rebuild, balancing lifestyle imagery with navigation, PLPs, PDPs, and vehicle-specific product discovery; total sales increased 29% following launch.
- Co-led UX design for Lippert's Support site rebuild, centered on AI-powered conversational search; used AI to rapidly build functional HTML prototypes, set up unmoderated studies, and supported moderated testing with B2B dealers and direct-to-consumer customers to validate the direction.
- Co-led UX design for Lippert.com's vehicle-fitment experience, enabling customers to enter vehicle details, view fitment status on product cards, and discover both confirmed matches and products requiring additional vehicle information.
- Led UX design for the Furrion.com Shopify rebuild, guiding theme selection, custom component design, content-team training, and developer implementation.
- Spearheaded the adoption of usability testing within the UX team, establishing unmoderated testing with functional prototypes as a regular part of major projects and expanding team capacity to support ongoing research.
- Applied a human-led, AI-assisted design process to accelerate design exploration, prototyping, and iteration, reducing the time required to move from concept to testable experience.

VF CORPORATION, Senior UX Designer *Feb 2023 - Sept 2024*

VF Corporation is the parent company of iconic brands such as The North Face, Vans, Timberland, Smartwool, Dickies, Altra and more.

- Redesigned the mini-cart user experience for The North Face and Vans. Improvements were based on prototype usability testing, competitive analysis, and brand stakeholder input, with a projected project value of $6.6M.
- Led UX design within a cross-functional team to launch Timberland's customer rewards program, including a rewards dashboard and redemption experience.
- Designed estimated-delivery-date experiences for The North Face and Vans product pages, informed by competitive analysis and prototype usability testing.
- Partnered with the research team to identify opportunities to improve product-page conversion for Timberland's EMEA region.

ALLEGION, Senior Interaction Designer *May 2022 - Nov 2022*

Designed a mobile app for Allegion, a global security and access company, to support initial setup and settings management for a connected commercial hardware product.

- Conducted discovery research with customers to understand current product pain points and most desired application features.
- Created a journey map and problem statements to present to stakeholders.
- Designed wireframes for mobile app.

DIRECT WINES INC., UX/UI Designer *August 2019 - April 2022*

- Designed a pickup-location experience for wine orders across FedEx, Walgreens, and other partners.
- Redesigned the checkout flow resulting in a 44% increase in conversions.
- Redesigned main navigation & mega menu for Wall Street Journal Wine Club (WSJwine).
- Designed a dashboard for wine club members for the Laithwaites Wine Club.
- Created Figma design systems for the WSJwine and Laithwaites Wine Clubs.
- Conducted usability testing with interactive prototypes for all projects.

FACTSET, Senior UX Specialist *March 2019 - Jul 2019*

Interaction Designer, Jul 2017–Feb 2019

- Designed and enhanced the onboarding experience for the FactSet platform, accommodating around 1,000 new users weekly as a member of a pilot agile team.
- Designed a tool for investors to edit multiple investment simulation models at one time.
- Designed a message board for investment research notes.
- Collaborated with the UX design team on new design system standards.

CONSULTANT, Your Private Eyestylist *Jan 2017 - July 2017*

- Refined business objectives through a business/brand questionnaire, conducted user research, created personas and user flows, and designed/developed a responsive homepage.

FANDISTRO, Director of Business Development *April 2011 - June 2016*

FanDistro provided an incentive-based social media marketing platform for artists and brands to build brand awareness. FanDistro was named by Midemlab as a 2013 Finalist in the Marketing and Social Engagement category.

- Helped build FanDistro from concept to an award-nominated social marketing platform.
- Co-managed all aspects of the development cycle including UX/UI Design, Quality Assurance, Front-end Development, and Database Design.
- Managed artist newsletters, artist relations, customer service and the creation of an explainer video.
- Increased signups by over 200% after signup flow analysis and redesign.
